

Quarterly Morbidity Report

by Jeffrey Engel, MD, NC State Epidemiologist

The Morbidity Table is offered by the Public Health Committee of the Wake County Medical Society.

The Morbidity Table includes the number of reportable diseases and conditions reported to the Wake County Department of Health and Human Services by Physicians and laboratory directors as mandated by NC Law. The list of reportable diseases is not comprehensive as rare diseases with zero case reports (e.g. CJD, Leprosy) are not shown. For a complete list of reportable conditions see: http://www.epi.state.nc.us/epi/gcdc/manual/reportable_diseases.html

Notes: No value in a cell means 0 cases reported.

Previous quarter numbers may change as reports are verified. Surveillance is based on the date of the report, not the date of the occurrence.
